

We would like to inform you more detailed about the new INVICTUS turntable.

The INVICTUS is our new Flagship model. It can handle up to 4 tonearms at the same time. Each of them can be 9 to 12 inch.

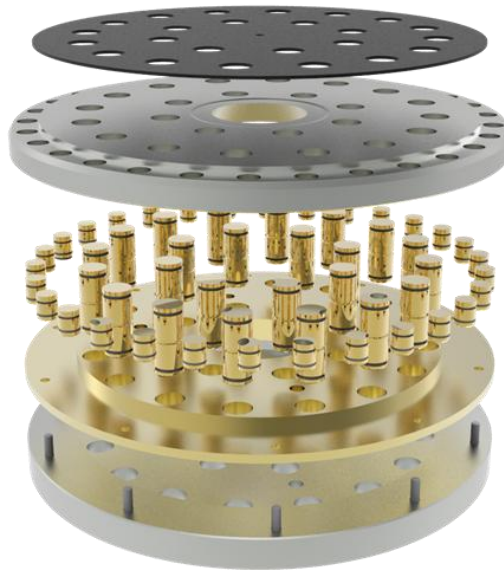

The INVICTUS is a really large turntable with 800x730 mm size. That is about 4 Barzetti! His weight is about 150kg without the available stand.

But we took care that no single part is too heavy so installation is possible by 2 people.

All sales in 2015 of the INVICTUS will be supported by the factory. So we send someone from the factory over to help you at the customers house or I come myself. That is free of charge for you.

The INVICTUS has a new Sandwich Silencer platter. It combines 2 Alu platters with a brass middle platter and Silencers.

See the picture:

The Chassis of the turntable and the Groundplate are milled out of a solid block and the Groundplate has internal structure milling to reduce the weight and increase the stability.

See the picture

There you see the structure and the 6 motors which drive the platter.
